PROFESSIONAL SUMMARY

Software Engineer with 4+ years of production experience building and maintaining scalable backend and full-stack systems in C#, .NET, and MS SQL across fintech and SaaS domains. Strong in REST API design, performance optimization and incremental modernization of long-lived codebases. Comfortable owning architecture decisions, mentoring through code review, and translating complex requirements into reliable, measurable improvements.

CORE SKILLS

Backend: C#, ASP.NET, ASP.NET MVC, Web API, .NET Core, EF Core, Entity Framework

Frontend: Angular, TypeScript, JavaScript

Databases: MSSQL, Oracle 11g

Practices: REST API design, Clean Architecture, n-tier, MVC, OOP, unit & integration testing

Tooling: Git, GitHub Actions (CI/CD), JIRA, HanSoft, Agile/Scrum, AI-assisted development

Communication: Stakeholder collaboration, code reviews, technical documentation

PROFESSIONAL EXPERIENCES

Software Engineer (Freelance)

AdvancePro Technologies, January 2023 – September 2025

Canadian SaaS inventory management platform integrated with Shopify, WooCommerce, and QuickBooks.

- Designed and optimized backend REST APIs in **C#, .NET Core and EF Core**, supporting real-time inventory and order operations for 200+ active business clients.
- Identified bottlenecks in an existing API surface and redesigned endpoints beyond strict REST conventions, reducing response times by **~30%** under peak load.
- Delivered reliable data synchronization across multiple external systems, ensuring consistency for inventory, orders, and financial data.
- Contributed to code reviews and refactoring, improving maintainability and reducing production issues.

.NET Programmer

MOBILITYONE *MobilityOne Sdn Bhd, December 2022 – August 2024*

Public-facing eBilling platform handling high-volume financial transactions.

- Designed and shipped an automated settlement system using **Hangfire background jobs** on .NET Core / MS SQL, reducing manual processing by **90%** and bringing 85% of transactions to completion within 24 hours.
- Built backend services with Clean Architecture, working closely with support and business teams to ensure transaction reliability across payment gateways.
- Contributed to backend architecture and consistent transaction handling across distributed components.

Software Engineer

Prime Tech Solution Limited, March 2018 – December 2020

Dynamic Software farm

- Enhanced supply chain transparency in the Banglalink DMS system serving 4,500 distributors and 200,000 retailers, implementing real-time updates with **SignalR**.
- Delivered an **ASP.NET MVC** system for IRIDP-2, enabling government-wide infrastructure project tracking with role-based dashboards and performance analytics.
- Built modular **.NET Core + Angular** e-commerce APIs for AARMOIRE, with CI/CD pipelines via GitHub Actions.

EDUCATION

- **Master of Engineering (M.Eng.) in Cloud based Software Engineering**

Vaasa University of Applied Science (VAMK), 2025

- **Bachelor of Science (B.Sc.) in Computer Science and Engineering**

American International University Bangladesh (AIUB), 2018

LANGUAGE SKILLS

BENGALI: Native, **ENGLISH:** Advanced (TOEFL: 96 [120]), **Finnish:** Actively Learning
