PROFESSIONAL SUMMARY

Software Engineer at Nexetic Oy since September 2026. Full stack developer experienced in C#, .NET Core, ASP.NET, Angular and MSSQL, delivering applications across SaaS, inventory management, e-commerce and fintech. Track record of reducing latency, improving transaction workflows and collaborating in multicultural teams.

CORE SKILLS

Backend: C#, ASP.NET, .NET Core, Web API, EF Core, RESTful APIs

Frontend: Angular, TypeScript, JavaScript

Data & cloud: MSSQL, Oracle 11g, Azure Functions

Engineering: Unit & integration testing, Clean Architecture, n-tier, MVC, OOP

Tools: Git, GitHub Actions, OpenAPI / NSwag, JIRA, HanSoft, Agile / Scrum, AI-assisted development

Communication: Stakeholder collaboration, code reviews, technical documentation

PROFESSIONAL EXPERIENCE

Software Engineer

Nexetic Oy | September 2026 - Present

- Contributed full-stack production features to a Microsoft 365 backup SaaS platform using C#, .NET, Angular, EF Core, Azure Functions and SQL.
- Implemented Microsoft LAPS backup functionality with encryption, tenant isolation, audit logging and automated tests.
- Built reporting and data-processing tools for licensing, customer attribution, backup health and migration verification.
- Contributed to OpenAPI / NSwag contracts, code reviews, technical documentation and development-process improvements.
- Used AI-assisted tools for planning, coding, testing and debugging while validating security and correctness.

Software Engineer (Freelance)

AdvancePro Technologies | January 2023 - September 2025

- Reduced API response times by 30% through performance analysis and a dedicated search API returning only essential data.
- Integrated Authorize.net payment workflows and automated invoices for 200+ active business clients.
- Developed RESTful APIs to synchronize inventory, e-commerce and accounting across platforms including Shopify and Avalara.
- Led code reviews and refactored legacy modules to improve maintainability and reduce bugs.

PROFESSIONAL EXPERIENCE / CONTINUED

.NET Programmer

MobilityOne Sdn Bhd | December 2022 - August 2024

- Built and maintained .NET Core APIs with MSSQL and Oracle for a public-facing municipal eBilling system enabling continuous utility-bill payments.
- Developed automated settlement using Hangfire for 200-300 daily transactions, reducing pending settlements by 90% and achieving over 85% completion within 24 hours.
- Collaborated with a four-member backend team on fintech modules and reliable transaction processing across regional payment gateways using microservices patterns.

Software Engineer

Prime Tech Solution Limited | March 2018 - December 2022

- Implemented real-time SignalR updates for Banglalink DMS, supporting supply-chain transparency for 4,500 distributors and 200,000 retailers.
- Delivered an ASP.NET MVC system for IRIDP-2, enabling nationwide infrastructure tracking with role-based dashboards and performance analytics.
- Built modular .NET Core and Angular e-commerce APIs for AARMOIRE, covering inventory, loyalty and reporting with GitHub Actions CI/CD.

EDUCATION

Master of Engineering - Cloud-based Software Engineering

Vaasa University of Applied Science (VAMK) | 2025

Bachelor of Science - Computer Science and Engineering

American International University Bangladesh (AIUB) | 2018
