PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience, building backend and full-stack systems across fintech, SaaS, telecom, and e-commerce. Strong in C# and .NET, API design, system integrations, and performance tuning, with a track record of making business-critical software faster and more reliable. Known for translating complex requirements into practical, high-impact solutions and working effectively across teams and stakeholders in distributed environments.

CORE SKILLS

- Backend: C#, ASP.NET, .NET Core
- Frontend: Angular, TypeScript, JavaScript
- Databases: MSSQL, Oracle 11g
- Testing: Unit & Integration Testing
- Tools & Practices: Git, GitHub Actions, JIRA, HanSoft, Agile/Scrum, Clean Architecture, n-tier Architecture, MVC, OOP, Web API, EF Core, RESTful API, AI-assisted development
- Communication: Stakeholder collaboration, code reviews, technical documentation

PROFESSIONAL EXPERIENCES

Software Engineer

nexetic *Nexetic Oy, September 2026 – Present*

- ✓ Develop and maintain features for the vendor portal and backup products for Microsoft 365 environments, using C#, .NET, and Azure
- ✓ Built customer-facing reporting features, including a customer billing report, and investigated and resolved data mismatches in report output
- ✓ Added new backup status tracking and billable user counts for Entra ID in the vendor portal, improving billing visibility for partners
- ✓ Resolved a customer support case by migrating customer backup storage from Azure to Amazon S3
- ✓ Contribute to code quality through pull request reviews and API contract maintenance (OpenAPI, NSwag)

Software Engineer (Freelance)

AdvancePro Technologies, January 2023 – September 2025

- ✓ Designed and optimized backend APIs for an inventory management SaaS platform integrating with Shopify, WooCommerce, and accounting systems, supporting real-time business operations

- ✓ Identified performance bottlenecks and redesigned API structure beyond strict REST conventions, reducing response times by 30% and improving user experience under load
- ✓ Collaborated with cross-functional teams to refine requirements and implement scalable solutions aligned with business needs
- ✓ Contributed to code reviews and refactoring efforts, improving maintainability and reducing production issues

.NET Programmer

MobilityOne Sdn Bhd, December 2022 – August 2024

- ✓ Built and maintained backend systems for a public-facing eBilling platform handling high-volume financial transactions
- ✓ Designed and implemented an automated settlement system using background jobs (Hangfire), reducing manual processing by 90% and improving completion time for 85% of transactions to under 24 hours
- ✓ Worked closely with support and business teams to ensure reliability of transaction workflows across payment gateways.
- ✓ Contributed to backend architecture and ensured consistent transaction handling across distributed components

Software Engineer

Prime Tech Solution Limited, March 2018 – December 2020

Prime Tech Solutions Limited is a technology company specializing in software development and IT solutions.

- Enhanced supply chain transparency in the Banglalink DMS system serving 4,500 distributors and 200,000 retailers, implementing real-time updates with SignalR.
- Delivered an ASP.NET MVC system for IRIDP-2, enabling the government to track infrastructure projects nationwide with role-based dashboards and performance analytics.
- Built modular .NET Core + Angular e-commerce APIs for AARMOIRE, supporting inventory, loyalty, and reporting features and CI/CD pipelines via GitHub Actions.

EDUCATION

- **Master of Engineering (M.Eng.) in Cloud based Software Engineering**
  Vaasa University of Applied Science (VAMK), 2025

- **Bachelor of Science (B.Sc.) in Computer Science and Engineering**
  American International University Bangladesh (AIUB), 2018

LANGUAGE SKILLS

BENGALI: Native**, ENGLISH:** Advanced (TOEFL: 96 [120]), **Finnish**: Actively Learning
